

## SIX.COM Solutions - Why Us?

*(Smart solutions in tough times)*

### **SIX.COM System Overview**

#### **Introduction**

The need to have effective systems to manage Health, Safety and Training have never been more critical to an organisation as they are now.

The SIX.COM Company has been created to develop online software to assist small, medium and large organisations effectively manage Health, Safety and training as an integrated part of the business. This software is based on systems that have been proven within industry over the last 10 years and has been developed and supported by Health, Safety and Environmental professionals.

This software has been developed by professions for professionals, is very affordable and easy to use.

## ***SIX.COM working with your business***

### **Online Software**

The only technology required to access and use this software is a computer with internet access (all common browser applications are supported). The application and data is stored on one of SIX.COM's secure servers and is available 24hrs a day 7 days a week.

### **Data Security**

Every customer has their own installation of the software and a separate database. All data (information entered into the system) remains the property of the Customer and can be handed back to the customer at any time.

### **Access and Log on**

All users must be set up with a username and password to be able to gain access to the system (no unauthorised access). This is managed and maintained within the application by a designated system administrator. Simply click some check boxes and access rights are added.

### **Effective Solutions**

SIX.COM provides highly effective solutions for today's business environment. The value proposition to your business includes;

- ***Integrated applications*** – a sophisticated system that integrates People, Plant, Health & Safety and Document management.
- ***Low cost of ownership*** – no big capital outlay for technical infrastructure or high monthly infrastructure support costs. Pay based on monthly usage (active employees).
- ***Technical infrastructure*** – industry standard and fully scalable infrastructure that can grow with your business.
- ***Accessibility*** – a system that is accessible from any location/site that has internet access.
- ***System performance*** – a system designed to perform over the internet. A system that will perform with low bandwidth.
- ***Ease of use*** – a system that is intuitive to use. Users access this software within a browser and use standard website navigation. This greatly reduces training requirements.

- **Data security** – your data/information asset is managed within a high security data centre with on site and off site backups.
- **Business continuity** – your system can be completely re built from backup and made available on line in the unlikely event of disaster, ensuring your business continuity.
- **System administration** – SIX.COM provides administration of the servers and infrastructure that the system runs on.
- **Helpdesk support** – SIX.COM provides a support desk contactable via e-mail or phone. Assistance in resolving issues and providing user support is available.
- **Look and feel Customisation.** – Customisation of the User Interface (UI) is provided. This allows the system to be branded with a company logo and to fit in with a corporate colour theme.
